Product Description

Good quality summer nice PVC pool double water slide dinosaur inflatable water slide for pool

Following are the Safety Features

1. Safety Net:

The platform safety net has a two-fold purpose. Firstly, it secures the riders on the platform, preventing accidents on the staircase and secondly, it restricts riders from performing dangerous tricks such as flips and dives.

2. TripleTube leg structure:

Our solid TripleTube leg structure with an ultra strong lattice frame delivers incredible strength and support for the entire slide. The ground leg spacers ensure that the legs stand perfectly upright and square.

3. EasyClimb stairs:

Our user-friendly EasyClimb stairs are manufactured from high density polyethylene with UV protection. Each stair has easy grip hand holders and non-slip grooves for a safe and easy climb for toddlers through to senior citizens.

4. Partitioned Staircase:

The staircase is divided into two lanes which restricts riders to ascend in single file, preventing overloading. Each lane has handrails on either side and the gentle 40 degree pitch of the staircase allows for a safe climb.

5. Landing Bed:

The landing bed is specially designed to slow the rider down and to provide a safe, cushioned landing.

6. Anchoring System:

PARADISE's unique anchoring system provides safety, stability and rigidity in the most adverse of weather conditions. This system allows our slide to withstand excessive wind loads without causing damage to the slide.
