

Big Air - Tight Portable Water Pool For Kids / Adults Yellow Color

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Barry
- Certification: CE, EN14960, , SCT, EN71
- Model Number: HBY-pool-062
- Minimum Order Quantity: 1 Piece
- Price: USD100-800/Piece
- Packaging Details: Product is packed by strong PVC bag and carton for blower, pump and other accessories
- Delivery Time: 7-15 Working Days
- Payment Terms: T/T, Paypal, Western Union
- Supply Ability: 500 Pices/Month

Product Specification

- Size: Customzied
- Material: PVC Tarpaulin
- Accessory: CE/UL Blower And Repair Material
- Payment: T/T, Paypal, Western Union ,cash And So On
- Leading Time: 7-15 Working Days
- Life Span: More Than 3 Years
- Mini Orde: 1 Pcs
- Color: Yellow
- Highlight: inflatable backyard swimming pools, inflatable kids swimming pool

Product Description

Activity pool inflatable pool ,custom commercial use children inflatable pool for kid

Details of inflatable swimming pool:

Our air-tight swimming pool is in good quality, All air-tight inflatable products are made by high temperature multi-function fusion splicer which is excellent for high efficient massive production and durable air-tight inflatable products.

The type of the inflatable swimming pool:

1. roundness
2. square/tetragonum

For the colour, any color is available.

How to Set Up The Inflatable Pools:

Firstly, we should choose a spacious ground to set up the inflatable pool. Besides considering the rooms for the inflatable pool, we should consider the rooms for the blower system. It is also need to check out if there are branches or windows above the ground, in case the sharp things above can puncture the pool, when it is inflated.

Secondly, clean up the sharp things on the ground, such as the rocks, branches. It is also better to find a soft cloth or tarpaulins to place on the ground. It can prevent the inflatable pool from puncture.

Thirdly, lay the inflatable pool on the cloth or tarpaulin, and straighten out the pool. And then inflate the pools according to the instruction of the blower system. It is not good to inflate the swimming pool too much. If it is inflated too full, it may be broken because of the air pressure. It exist the day-and-night temperature difference. So pay attention of the temperatures. If it is too hot, you should deflate some air. If it is a little cold, you should add some air in the inflatable pool. Pressure may break the inflatable pools. Pay attention of the pressure is important.

Finally, fill the inflatable pool with water. The depth is up to you, but it is supposed to be less than two-thirds of the inflatable pool. If the water is too high, it will suffer the unaffordable pressures and be out of shape, and it will tear at the end.

How to repair Inflatable Pool Inflatable Water Pool Inflatable Swimming Pool For Sale

- 1- Find out exactly where the leak is.
- 2- Prepare the hole for patching
- 3- Apply plumber's goop liberally to the seam and let it dry for about 15minutes.
- 4- Fill the Roller about halfway with air and wait another 30minutes or so to make sure that the goop has dried completely.
- 5- Inflate the water roller completely and spray it again with the soap and water mixture to make sure that the hole is indeed fixed.
