Advantages

- 1. Product development and design**
 We use Rhino, CAD, CDR, AI to complete our design. Accurate to every detail (pulling ring, handle).
- 2. CNC cutting**
 High-precision CNC cutting, the data is more intuitive, more accurate, and the error is small.
- 3. Manual measurement**
 For places where machine cutting is not possible, manual measurement and cutting are used. High flexibility and easy calculation.
- 4. High frequency welding**
 Our company has mature high-frequency welding technology, and high-frequency current connects the products together. Although high-frequency welding is mostly used for metal welding, when used for PVC welding, the welded product is strong and reliable, and has strong tear resistance.
- 5. Hot air welding**
 Hot air welding is one of the main welding processes for product manufacturing. The electrodes are heated with preheated compressed air and welded together.
- 6. stitch**
 Needle sewing, here we use double-sided sewing procedure. Both beautiful and solid.
- 7. Product testing**
 Each product is fully tested (48 hours) before packaging.
- 8. Compressed air**
 After testing the product without defects, drain the air and compress the bundle.
- 9. Clean packaging**
 Final packaging in clean room.
