Product Description

Home Used Small Size DWF Air Gym Track Inflatable Gymnastics Balance Air Beam

What is the air track mat?

Airtrack Mat will stand repeated jumps and hard trampling without wearing off that easy. This is because it is made of smooth rubber that cushions against the air inside. This is contrary to the old gymnasium equipment that wore out so fast. There is no that destructive and obnoxious noises during training since once the air-track is inflated that is enough until training is over. This gives you a piece of mind and a chance to closely concentrate on your techniques. The air inside is soft and bouncy enough to give you a higher jump. In this case it gives you an air-time to perform that twist or turns in the air before landing.

Size:

Height (10, 20 or 30 cm high) and a length and width that fit your gym best.

Quality Control Steps:

- 1) All materials are sourced, bought, and controlled by our factory.
- 2) All mats under-go a multipoint inspection before being shipped out, including: a 16 hour pressure test to ensure airtight seals and pre-shipment pictures and videos are made to document each product.
- 3) Air Track are individually labeled and documented to monitor and file the complete production process.

If it's air leaking, don't worry! 99% of all damages are repaired within 10 mins using the repair kit. We have material and instructions ready for you and we'll assist you in every step of the repair process.
