## Product Description

### Christmas festival promotional black mini inflatable air track for home use or event

#### What is the air track mat?

Airtrack Mat will stand repeated jumps and hard trampling without wearing off that easy. This is because it is made of smooth rubber that cushions against the air inside. This is contrary to the old gymnasium equipment that wore out so fast. There is no that destructive and obnoxious noises during training since once the air-track is inflated that is enough until training is over. This gives you a piece of mind and a chance to closely concentrate on your techniques. The air inside is soft and bouncy enough to give you a higher jump. In this case it gives you an air-time to perform that twist or turns in the air before landing.

#### Size:

Height (10, 20 or 30 cm high) and a length and width that fit your gym best.

#### Our advantages:

All of our PVC Tarpaulin is designed to be the strongest, waterproof, fireproof

All seams are either double or quadruple stitched for strength, durability and longevity. And only premium quality thread is used.

All of our units are designed with a deflation zipper that utilizes a Velcro flap that covers the zipper, thus, less air is lost and zippers are not exposed to abrasion or mischief.

Pillars, edges and step/ramp are reinforced.

Safe & easy to use.

On the inside of every inflation tube lies a simple PVC Tarpaulin flap that is designed to flop closed if air flow is interrupted, thus slowing the loss of air
