Product Description

Blue Inflatable Air Track Gymnastics , Double Wall Fabric Air Trak Mat For Gym

[air track Instructions.pdf](#)

Description:

If you've been looking for a way to boost your skills faster than ever, you've found it! The AirTrick is the ideal mat for anyone trying to learn new tricks or perfect his technique.

Enjoy the bounce a normal trampoline offers while having the space to combine multiple moves like you're on a regular gym floor. You can set the pressure to anything between rock-hard and bouncy-soft. Easy to roll up and transport in a regular car.

All AirTricks are custom made. Choose your ideal height (10, 20 or 30 cm high) and a length and width that fit your gym best.

Especially designed for the annual festivals, shows - acts. Due to the compact transport and storage space it's perfect for hiring. The ordinary competition floor is transported in a container, while the 'Big Air Floor' can be moved into a small van. The set-up and breaking occurs in only 10 minutes, so not comparable with the Competition Floor that you set up with 10 people in one hour.

Set-up in only 10 minutes

Adjustable hardness!

Perfect for show and demonstrations!

Size:

Height (10, 20 or 30 cm high) and a length and width that fit your gym best.

Tips:

In order to enjoy your AirTracks for many years we made a set of rules based on our experience and feedback from our clients which should be respected:

1. The AirTrack set up should only be done by authorized or competent persons.
Always check the surface, it must be clean, dry and even. When outside always use ground sheet under the AirTrack.
2. To move use the handles on each side (HP 20, HP 33), never drag the Air Track.
3. There should always be an appropriate accompaniment to the track side if it is in use.
4. Don't use the AirTrack in damp spaces.
5. Don't use the AirTrack in the rain.
6. Don't store the AirTrack dirty or wet.
7. Do not use the AirTrack with shoes.
8. If using a manometer (pressure gauge) during inflation, be sure to remove the manometer while the Air track is in use.
9. Place safety matting at the ends of the AirTrack.
10. Once using the track there should be a mat for landing, this can be connected by the closure which will avoid also the small space created by the round shape of the AirTrack.
