Product Description

Kids Inflatable Bounce Jumping Castle Kid Fun Inflatable Castle

Advantages:

- 1) Innovative design and bright color-matching
- 2) Environmental-friendly and safe raw material
- 3) Superior quality, reasonable price

We are warmly welcome customers all over the world. We promise provide you with reasonable & competitive prices, good quality of products, punctual shipment and the best service during our long cooperation.

Details of the inflatable we sell:

All of our Inflatable bouncing houses / jumping castles feature vibrant colors, popular themes, a soft / high quality thick vinyl material for safe bouncing. It's the perfect entertainment for any kids' gathering, whether it's a themed birthday party, grand opening, or school field day.

The vibrancy of colors and details are a result of the manufacturer's use of 3-D design and high-resolution, high-speed digital printers. Our manufacturer of these inflatable games, uses a liquid laminating machine to coat the vinyl with a PVC membrane.

These inflatable bouncers / jumping castles are enclosed and easy to set up and take down for quick storage, so renters can assure their customers of quick and convenient set up, while storage space will not inhibit the variety of playgrounds available. Distributors can likewise emphasize convenience of use to their customers. We ensure that durability is key in creating these products.

The inside of the bouncer is constructed of high quality PVC material, which allows for optimal airflow and creates a balanced bouncing surface. Finally, all inflatable games are designed for easy supervision, essential for any safe gathering of children. The mesh is cut from 1000D netting, which is easy to see through, but does not allow small fingers to get caught in the mesh and injured during play. Any rental business or distributor knows that safety is singularly most important factor for kids' products.

The manufacturer makes safety its number one priority; so we ensure that every inflatable game... .. at least double stitching (triple or quadruple stitching in highest stress areas) ... has excellent sewing technical which uses 4 to 6 stitches per inch to ensure minimal air loss

... is enhanced with strong, large mesh windows on every side for easy adult supervision.

... passes flammability and toxin tests.

... is designed with large pillars on all corners to strengthen the structure.

... includes a Safe Step (and when necessary a safety screen on top of outside slides) to assist children entering and leaving and to prevent falling.

...is made from strong, flame retardant vinyl.

...is user-friendly and easy to set up by blower.
