### Why Choose Barry Industrial

Barry has been concentrated in inflatable toys for many years and is able to custom make any inflatable products according to customers' requirements, such as inflatable bouncers, castles, slides, combos and more. Our water slides(the longest slide in Dubai is made by us), water parks(more than 2000 successful cases both home and abroad), inflatable tents (inflatable/airtight/EXTRA giant) and inflatable toys (land/pool/lake/ocean) have earned ourselves a good reputation for the excellent quality, fast production, prompt delivery and price!

#### How to repair the inflatable floating island park?

1. Find out exactly where the leak is. Fill a spray bottle with a mixture of soap and water and spray it liberally on the water sports along the seams. You will notice that the solution starts to bubble up where the leak is located, so take note of the position of the hole.
2. Prepare the hole for patching. Dry the seam off, and make sure that it is completely deflated before attempting to patch the seam. If you have the patch kit that came with the water sports, you can use the prep solution to thoroughly clean the rubber before proceeding. Rubbing alcohol also works.
3. Apply plumber's goop liberally to the seam and let it dry for about 15minutes. If possible, apply some goop to the inside of the seam as well, so that it spreads out and gives an extra layer of protection when the water sports pressurizes.
4. Inflate the water sports halfway with air and wait another 30minutes or so to make sure that the goop has dried completely.
