Material: 0.9mm PVC

Printing: Logo, banner or picture as customized

Character: two zone impact absorbing system

Accessories: CE/UL air blower, repair kit

Set Up Time: 20 minutes

Install: 4 person

How it works

The Big AirBag LANDING has a two-zone impact absorbing system, each with its own internal blower system. Both zones have several air valves that allow you to adjust the zones independently and precisely. Set up a soft upper chamber with a firm lower chamber for trying tricks for the first time. Ready for the real deal?

The landing airbag offers the ultimate training scenario. Whether you want to go huge like the circus guys or you are practicing your first jumps at your local bike park, the landing airbag will soften your crashes and even allow you to ride away from your trick if you land wheels/base down.

Features

1. Adjustable softness and firmness
2. Highly advanced fabrics
3. Ride away Topsheet technology
4. Inflatable ramps
