#### Applications

:

This set of water park can be placed in the sea, lake or pool and can hold about 60 people . Its size and color can be changed based on original design . Even you can design the model as your ideas .

#### Advantages :

1. All our materials are purchased from Plato factory , special material -- 0.9mm PVC Tarpaulin , more expensive than general 0.9mm PVC Tarpaulin . We can send you some materials for your testing .
2. Welded strongly with high temperature machine and experienced workers . Besides , reinforced a extra strip on all seams , stronger and more durable .
3. Installing reducing pressure valve . When the airpressure is exceed when temperature is upto a high degree, this reducing presure valve will make the product deflated automatically , in case of the product would blast because of the exceed pressure .
4. Strong D rings and handles , it is very difficult to tear them off .

#### Maintanace menthond and the attentions:

1. if the product appear small damage , under 5 cm, can be repaired by glue.
2. if the damage area is larger , please select a needle to thread-stitching , then repaired by glue ; or select professional factory for maintenance.
3. clean the damage with clear water , dry with clear dishcloth , blow to dry completely.
4. use the material of the same color to repair , cutting a patches , the area size need larger than the damage area.
5. cover the damage by patches , and mark surrounding the patches.
6. glue on the patches coated with a thin layer , note is not glue as thick as possible.
7. toated with a thin layer of glue inside the loop , be carefully not to gule out the loop .
8. afters a few minutes , aligning patches with the damage , stablish .
9. in the process of paste , slightly with blower , heating , make pasting more firmly .
10. if bubbles appeared in the process of pasting , can use hair dryer heating , meanwhile , use flat thing to move out the gas.
