Product Description

Lifeguard Rescue Board Wave Surf Extraction Board Inflatable Paddle

Rescue Board:

Lifeguards and public safety agencies around the world are embracing an innovative rescue system that already has saved hundreds of lives, and promises to save thousands more in extremely rough water situations such as ocean storms, heavy surf, rip currents, flooding rivers, and other life-threatening situations. is highly maneuverable. It barely affects low-speed motoring and increases the overall stability of the craft. There is no chance of windmilling or dumping of the victim.

Introduction:

Rails allow sufficient tracking for stability and still allow the driver to break loose' for quick turns.

An inexpensive, replaceable nose-guard protects the nose of the board.

Overall size is sufficient for two adults yet still highly maneuverable. Weighs only 35 lbs.

The Swallow-tail design enables easy victim centering when mounting in the water.

Inflatable SUP construction:

Single-layer & Double layer (2 layers glued on each other)

The construction layer in itself is airtight and is about 0.5 mm thick made from mesh and PVC. Some brands simply sold the board in this construction, which called in the industry "single layer" But others glued a second layer of PVC on the construction layer. This is called in the industry "double layer" Fusion technology double layer Instead of gluing on a second layer, the construction layer was simply made thicker, melting more PVC on it. This is called "Fusion technology" or "double layer light" or "double layer fusion"

inflatable water rescue sup board:

Inflated size: (custom made)-Length x Width x Thickness;

Material: PVC tarpaulin+drop stitch material+EVA pad

What you get: 1 board + 1 hand pump with gauge + repair kits(NO glue) + carry bag
