Usage	commercial activities,rental bussiness,party,club,amusement park, family ,school ,ect

Our advantages:

1.Material Brand:

Best material is very important for the games. All inflatable games of Barry are made by high durability fire-retardant PVC Tarpaulin, which has 3 layers as you can see from picture No.1, two coated side with a strong net inside.

2.Sewing Technology:

Triangle structure, all of our floors use floor strips for additional reinforcement.Barry Inflatables will make reinforce strips at the bottom joint and each corner details. So when the kids bounce on the games, you do not need to worry about the safety at all. As the bottom can bear the kids no matter how they play on the games.A lot of cheap product do not make this technology, that will be make the product lifetime not enough 1 year.

3.Safety Flap:

On the inside of every inflation tube lies a simple vinyl flap that is designed to flop closed if air flow is interrupted, thus slowing the loss of air.

4.Safety Net:

Most inflatable game manufacturers use right side 5mm fabric netting or bigger size hole safty net. A child bouncing can easily catch their fingers in that size of netting, thus serious injuries can happen. Fabric netting is not strong enough, easy deformation, wet and broken when long time use. Only we employs unique netting that only 2*2mm hole, even a small child's finger cannot penetrate, the net is also waterproof and flame retardant, Yet, the netting is still transparent enough to allow for easy viewing.

5.Stronger Baffles:

Baffles that are secured by a 1000x1000 denier material that provides the MAXIMUM strength of the internal baffling of every inflatables.This material upgrade is unmatched by anyone else in the industry. This material is key to the overall durability of the products we sell.

6.Neat Stitching Thread:

Durable 12 strand nylon thread which is higher abrasion resistant and tor proof We do double stitching everywhere, with fourfold stitching at bottom stress point. Double stitching inside and double stitching outside to make sure the inflatables are strong enough.

7.Zipper With Flap:

Unlike others, Barry inflatables sells products that are easy to use. For example, the deflation zipper utilizes a hook&loop flap that covers the zipper, thus, less air is lost and zippers are not exposed to abrasion or mischief.

8.Reinforce Conner:

The help handle is easy broken when long time use by big kid or adult, as you see, we reinforce it with double strip, and make help handle on the climbing ladder, kids can climb the ladder more easy.

9.D-rings For Safty Fixed:

Take a close look at the construction of the "d" rings in the products we sell. A tether system is only as strong as its weakest link. Tether points on the inflatable are extremely durable. The "d" ring tethering System have been laboratory-tested by Professional Engineers for use on all giant slides and all other types of inflatables.

We still own more details advantage, want to learn more? Contact us soon!!!
