Installation Instruction

1. Having checked that the surface is free of sharp objects unfold your wash mat as pictured.

2. Turn the cap counter-clockwise to open air inlet.

3. Make sure that the air inlet valve is exposed.

4. Plug in pump as pictured.

barry.en.alibaba.com

DO NOT OVER INFLATE. Inflate to a level of 130mm (13cm) in the middle of the wash mat when two people are standing on the rim of the mat as pictured. This will ensure that your wash mat does not burst with the addition of a vehicle. This level of inflation also makes allowance for hot weather which will cause the air in your wash mat to expand.

Notes:

1. Be careful not to let foreign matter inside the wash mat.
2. Make sure you close the cap of the air inlet if there is a lot of sand and dust.
3. If wash mat not used for a long time ensure that it is stored completely emptied of air.
4. Please store at room temperature. Extreme heat or cold will reduce the useful life.
5. When in storage, do not place any heavy items on the wash mat.

How to repair?

1. Completely cut away the damaged part of the wash mat
2. Prepare a patch that is slightly larger than the hole.
3. Clean both the patch and the area around with hole with a similar cleaning chemical and wipe dry.
4. Apply glue to both surfaces and then firmly apply the patch to your wash mat. Avoid bubbles. Press and hold firmly until firmly bonded (1-2 minutes). Ideally, allow 24 hours before use.
5. Ensure that you use only glue provide by H2GO systems.
6. Keep glue out of reach of children.
