One Bouncy Slide for All Seasons - Kids enjoy climbing up and sliding down, burn off all that extra energy. Bonus Wet Use Design, with additional water sprinkle and pool for holding water for your next summer fun!

Quality Assured Barry Inflatable Since 1997 Durable & Lasting

High Quality Commercial Grade PVC Vinyl (1400*1400 Denier Vinyl) as Materials
Stronger Baffles Offer Maximum Strengths, Secure Excellent Legendary Durability
Multiple Rows Stitching Reinforced Seams to Bear Higher Stress against Ripping
HD image Color,Silk Printing at 1400DPI , UV&Rain Resistant, Not Easy to Fade

Stronger Baffles Key to the legendary durability

Baffles provide the internal structure of an inflatable. Have you ever seen a bounce house with a mattress that has ballooned out? Blown baffles are likely to blame. That is why we only use baffles that are secured by Commercial Grade Vinyl at 1400*1400 denier that provides maximum strength and durability. This material is also perfect for inflatables used in an indoor environment (as they often receive much more use and abuse) and is key to the legendary durability of our products.

Safety Material

DID YOU KNOW
Our Inflatables are LEAD-SAFE?
"Lead-Safe" means below 90ppm,
CPSIA and California Prop #65
compliance limits are 300ppm

Commercial Grade
High Quality PVC Tarpaulin
Lead-Safe
Fire-Retardant

Our products all meet
Europe standards EN71
EN14960 and EN15649

All of our inflatables are constructed from materials that are lead-safe, meaning levels below 90ppm and meaning our inflatables are safe for children. We also use vinyl materials that are flame-retardant and meet different countries, large and small-scale tests. Do your homework before dealing with any inflatable manufacturer, and make sure they're not using cheaper materials that could be dangerous to children. We never cut corners with our products, and always strive to provide the safest environment possible, even if it costs a little more.

Reinforced Seams Against Ripping or Air Leak

We always use at least two rows of stitching on all of seams. But some seams just need a little extra, especially on high-stress areas like a bounce house's mattress. Think of those kids jumping up and down, up and down, up and down, and you get the picture. That's why we insist on reinforcing each and every one of those critical mattress seams by using a seam reinforcement strip that bridges the seam, thus eliminating the stress.

HD Printing

Rich Vivid Color, Various Funny themes

- ✓ High Definition (HD)
upto 1400 DPI
- ✓ Silk Print
Digital Art Work
- ✓ Rich Color Design
Vivid Images
Funny Themes
- ✓ Durable Vinyl Coated Nylon
