Product Description

Commercial Grade Outdoor Wave Inflatable Kids Slides With Small Pool Children Water Slide Pool Inflatable

Description About The Water Slide:

BRING THE PARTY HOME – Save Time & Money by Splashing in Your Own Backyard Instead of the Pool or Beach; Perfect for Birthdays, Parties & Everyday Summer Fun

Baffles provide the internal structure of an inflatable. Have you ever seen a bounce house with a mattress that has ballooned out? Blown baffles are likely to blame. That is why we only use baffles that are secured by Commercial Grade Vinyl at 1400*1400 denier that provides maximum strength and durability. This material is also perfect for inflatables used in an indoor environment (as they often receive much more use and abuse) and is key to the legendary durability of our products.

All of our inflatables are constructed from materials that are lead-safe, meaning levels below 90ppm and meaning our inflatables are safe for children. We also use vinyl materials that are flame-retardant and meet different countries, large and small-scale tests. Do your homework before dealing with any inflatable manufacturer, and make sure they're not using cheaper materials that could be dangerous to children. We never cut corners with our products, and always strive to provide the safest environment possible, even if it costs a little more.

We always use at least two rows of stitching on all of seams. But some seams just need a little extra, especially on high-stress areas like a bounce house's mattress. Think of those kids jumping up and down, up and down, up and you get the picture. That's why we insist on reinforcing each and every one of those critical mattress seams by using a seam reinforcement strip that bridges the seam, thus eliminating the stress.

Custom Made all Cartoon Theme

Industry leading digital art work, printed by the best digital printers on the market, We use a fantastic lacquer process to protect the artwork which is perfect for protecting against the varying weather. We bring in professional HD printer for product printing and the printing result can reach 1400 DPI. The durable vinyl coated nylon is resistant to UV, aging and scratching, which ensures a long-lasting company and brand profile.
