Feature	Long Color persistence/Well tailed / Durable / Water and fire proof/ High temperature and low temperature resistance / UV-Resistance
Workmanship	Professional automatic cutting machine, digital printing, film laminating, reinforcement sewing, experienced workers to ensure the quality.

Product features:

1. Completely assurance

Our structures work with double stitching and four line stitching, they are 100% strong. They require the constant use of an electric compressor, and therefore need to be connected to an electric socket or to a generator.

2. Easy of Use

Ten minutes are all that is required to inflate our modules with a CE pump. This time is greatly reduced by the use of 780W electric pump. It is of course possible to inflate them in the traditional way, by using a mains voltage pump. Our products eliminate problems with interlocking tents together, creating multiple rooms and any problems with assembly instructions.

3. Safety of use increased

Our structures do not have rigid element. This ensures the best security for present material assets and people.

Why Choose Us?

Guangzhou Barry Industrial Co.,Ltd is a professional inflatables company, integrating R&D, production and sale. We have provided many overseas clients with creative and successful designs in 3D on inflatable floating water parks, inflatable tents and some other inflatables, such as inflatable bouncers, inflatable slides ,inflatable sports game and so on.

Our company upholds the "quality of survival", " integrity and development" and "service as the core" business philosophies and purposes, looking forward to cooperate sincerely with customers at home and abroad to realize a win-win situation and mutual development.
