#### 2.Strong Baffles

Baffles provide the internal structure of an inflatable.Have you ever seen a bounce house with a mattress that has ballooned out? Blown baffles are likely to blame. That is why we only use baffles that are secured by Commercial Grade Vinyl at 1400\*1400 denier that provides maximum strength and durability.This material is also perfect for inflatables used in an indoor environment(as they often receive much more use and abuse)and is key to the legendary durability of our products.

#### 3.Safety for kids

All of our inflatables are constructed from materials that are lead-safe, meaning levels below 90ppm and meaning our inflatables are safe for children. We also use vinyl materials that are flame-retardant and meet different countries, large and small-scale tests. Do your homework before dealing with any inflatable manufacturer, and make sure they're not using cheaper materials that could be dangerous to children. We never cut corners with our products, and always strive to provide the safest environment possible, even if it costs a little more.
