Product Description

Drop Stitch Fabric Gymnastic Mat On Water Inflatable Floating Yoga Mat

Product features:

1. Completely assurance

Our structures work with good sewing technic, they are 100% strong. They require the constant use of an electric compressor, and therefore need to be connected to an electric socket or to a generator.

2. Easy of Use

Ten minutes are all that is required to inflate our modules with a CE/UL pump. This time is greatly reduced by the use of 780W electric pump. It is of course possible to inflate them in the traditional way, by using a mains voltage pump. Our products eliminate problems with interlocking tents together, creating multiple rooms and any problems with assembly instructions.

3. Safety of use increased

Our structures do not have rigid element. This ensures the best security for present material assets and people.

What material we used?

DROP STITCH FABRIC(double wall), many space yarn inside, to keep the surface flat!

Electric pump for inflate & deflate.
