Product Description

Product Description:

The Inflatable Floating Water Park is a must-have for anyone looking to create a fun and exciting outdoor water experience. This blow-up aquatic park is perfect for setting up in lakes, ponds, or any other body of water to provide endless entertainment for all ages. With a minimum order quantity of 1 piece, it's easy to get started with your very own floating island for the lake.

One of the standout features of this outdoor inflatable water park is its customized size, allowing you to tailor it to fit your specific space requirements. Whether you have a small pond or a large lake, this inflatable water park can be designed to suit your needs perfectly. When it comes to shipping, you have the flexibility to choose from various options including by sea, by air, or by express. This ensures that you can receive your inflatable water park in a timely manner, no matter where you are located.

Customization doesn't stop at size - you can also choose the color scheme that best suits your preferences or branding. The ability to customize the color of this floating island for the lake allows you to create a visually appealing and unique water attraction.

In terms of features, the Inflatable Floating Water Park boasts a range of qualities that make it a top choice for water enthusiasts. Its durable construction ensures that it can withstand hours of playtime without showing signs of wear and tear. Additionally, being waterproof, this inflatable water park is designed to handle splashes, waves, and all kinds of water activities without losing its functionality.

Another key feature of this outdoor inflatable water park is its anti-UV properties, which help protect the material from sun damage and ensure that it retains its vibrant colors for longer. This makes the inflatable water park a long-lasting investment that will continue to provide enjoyment for years to come.

Shipping Information:

- The water park will be shipped via a reliable carrier service to ensure safe and timely delivery.
- Customers will receive a tracking number to monitor the shipment status and estimated delivery date.

FAQ:

Q.Can I custom made my inflatable floating park?

A.Yes,size,shape,color,Let us know what we need.We can do it.

Q. Does Inflatable park need a constant air pump for inflation?

A.The products do not use constant air inflation instead the products only need to be inflated once as they are sealed.

Q. How are the modular sport water park connected to another ?

A.With 2 connector straps and 1 safety flap.The two connector straps are attached to anchor plates located underneath the products then the safety flap is placed over the two products and fixed through magic tape .

Q: Required spot's size L x W (m) ? How far from the beach line?

A: Your spot size "outside your water park of choice" should be around 10m wider and by 10m longer. You should be about 10m from the shore line (+-, depending on depth) to approach,the people now walk and enter the water and swim the 10m to the water park.Some think there should be a walkway but swimming out is more fun.

Q: What time is needed for assembling water park games system and preparing it for use ?A: It will take two days for the first set up since installing the anchors and such. After the anchors are in place, you can drag the park out of the water in two hours (no deflation). However, that is only necessary for violent storms to shore it and tie them down. Leaving in the water won't hurt the park for typical storms.

Q: How many employees should we hire for maintaining the water park games system and customer servicing ?

A: We will need a staff of at least 10 person for a given day decided on the fact that we use the large park size we mentioned.. a 120 park. most of them need to be qualified life guards. the ones that aren't are the shore line staff. But they should have a first aid certificate for emergencies. out of 10 you would have maybe 6 life guards on guard with two rotating for breaks and lunches. Another is selling tickets and another is the life jacket monitor and loud speaker instructor. These people can relieve each other for washroom break and can eat during their station time.. they are more relaxed in their duty.. and you still have the two other life guards that can help now and then.

Q: How long does it take to set up the park on water?A: The set up time depends on the number and size of the products as well as the number of set up labors. For example, if the anchors are in place, the capacity of 100 person's aqua park need takes 1-2 days for 6 persons.

Q:What's the life span for use in fresh water and salt water ?A: The life span is 2 years in salt water , 5 years use in fresh water .If you use it well and have a longer lifespan.

Q: Could you please send me a few drawings of the land setup part for ideas? A: Yes, i would be happy too. Once you have a location in mind, send me photos and possibly a sketch with rough, walked out dimensions. I can look it over for you and make suggestions for an ultimate setup!
