

Outdoor Reconnaissance Drone Military Helicopter Inflatable Fighter Jet Decoy

Our Product Introduction

for more products please visit us on inflatables-toy.com

Basic Information

- Place of Origin: Guangzhou,China
- Brand Name: Barry
- Certification: CE, EN14960, , SCT, EN71, BSCI
- Minimum Order Quantity: 1
- Price: Negotiate
- Packaging Details: Durable PVC for inflatable, standard export carton for blower
- Delivery Time: 7-15 days
- Payment Terms: Western Union, MoneyGram, T/T, D/P, D/A, L/C
- Supply Ability: 500 Pices/Month

Product Specification

- Item: Inflatable Fighter Jet Decoy
- Safetyfeatures: Fire Retardant Material Options
- Demension: 14x10x4m Or Customized
- Leading Time: 7-15 Working Days
- Logo Printing: Acceptable
- Colour: Can Be Choose
- Style: Can Be Customized
- Packing: PVC Tarpaulin Bag
- Highlight: inflatable military helicopter decoy, outdoor reconnaissance drone decoy, inflatable fighter jet advertising

Product Description

Outdoor Reconnaissance Drone Military Helicopter Inflatable Fighter Jet Decoy

Product Overview

Our Inflatable Fighter Jet Decoy is a full-scale, highly realistic replica designed to mimic the iconic Su-27 series fighter aircraft. Engineered for rapid deployment and tactical deception, it serves as a critical asset for military training, battlefield camouflage, and counter-reconnaissance operations, effectively misleading enemy optical and electro-optical surveillance systems.

Parameter	Details
Material	Reinforced PVC/nylon composite (waterproof, UV-resistant, tear-proof)
Inflated Dimensions	Customizable (matches full-scale Su-27 fighter jet dimensions)
Inflation Time	10–15 minutes (with 110V/220V electric blower)
Storage Size	~120×80×60 cm (folded)
Net Weight	60–80 kg (varies by size and configuration)
Service Life	3–5 years (with proper maintenance and storage)

Key Features

High-Fidelity Visual Replication: Meticulously crafted to replicate the exact silhouette, contours, and markings of the Su-27 fighter jet, including authentic cockpit design, swept-back wings, twin vertical stabilizers, and simulated missile armaments. The signature light blue livery and red star insignia enhance long-range visual authenticity.

Rapid Inflation & Deployment: Fully inflatable within 10–15 minutes using a portable electric air blower, enabling quick setup in remote airfields or forward operating areas. Deflation is equally efficient, allowing it to be folded into a compact, transportable package for easy relocation.

Durable & Weather-Resistant Material: Constructed from reinforced, tear-resistant PVC/nylon composite fabric with UV-stabilized coating, it withstands extreme outdoor conditions—including high winds, rain, and intense sunlight—ensuring long-term durability in diverse operational environments.

Portable & Lightweight: When deflated, it packs into a rugged carrying bag, weighing only 60–80 kg (depending on size), making it easily transportable by infantry, light vehicles, or aircraft for rapid strategic redeployment.

Customizable Design: Available in multiple camouflage patterns and national insignia, with optional add-ons like simulated exhaust plumes or landing gear details to enhance tactical realism against advanced surveillance systems.

Applications

Tactical Deception: Creates false fighter aircraft deployments to divert enemy intelligence, missile targeting, and aerial reconnaissance, protecting real air assets from detection and attack.

Military Training: Provides realistic simulation scenarios for pilots and ground troops in aircraft recognition, camouflage techniques, and airfield defense, without risking operational aircraft.

Film & Event Props: Serves as a safe, cost-effective alternative to real fighter jets for movie productions, air shows, and military parades.

Competitive Advantages

Cost Efficiency: Eliminates the need to deploy real fighter aircraft for decoy purposes, drastically reducing operational costs and the risk of equipment loss or damage.

Non-Lethal & Safe: No fuel, ammunition, or mechanical components, making it completely safe for use in training exercises and tactical operations.

Superior Deception Effect: Matches the visual signature of real fighter jets at long range, effectively confusing both human observers and basic electro-optical surveillance systems.

Packaging & Delivery

Standard package includes: inflatable fighter jet body, high-pressure electric air blower, repair kit, storage bag, and detailed user manual.

Custom packaging and bulk order discounts available for military and government clients.

Global shipping options (air/sea freight) to meet delivery timelines for international customers.
