Product Description

Liquid Tight Floor Temporary Inflatable Car Wash Mat Semi Permanent And Permanent

Our inflatable wash pads are a mobile fluid-tight floor and have been developed by our manufacturer in response to market demand, resulting from environmental legislation and regulations.

We recommend this mat and ecosmart to everyone in the detailing business. It saved the world, saves time and makes money. The mat is easy to carry and fast to set up, while the eco product you offer are not only the best priced product but also the only product we have tested that work great.

Inflatable Wash Pad: Technical Information

1. PVC (Polyvinyl chloride) Standard Material

PVC is a relatively economically priced material, it is easier to work with, it has high resistance to UV and can be made flame retardant. Generally PVC can be used for traditional diluted detergents used in vehicle washing. Only in higher concentrations PVC is not specifically resistant to oils, petrol, chemicals, acids etc.

2.TPU (Thermoplastic Polyurethane)

TPU has a much higher abrasion resistance and has much better resistant to aggressive liquids, such as petrol, gasoline, mineral oils and chemicals in general. It can also be made with anti-static coatings though it is generally less resistant to UV and weathering.
