Product Description

Car Wash Garage Containment Mats And Water Reclamation System 20 Ft X 10 Ft

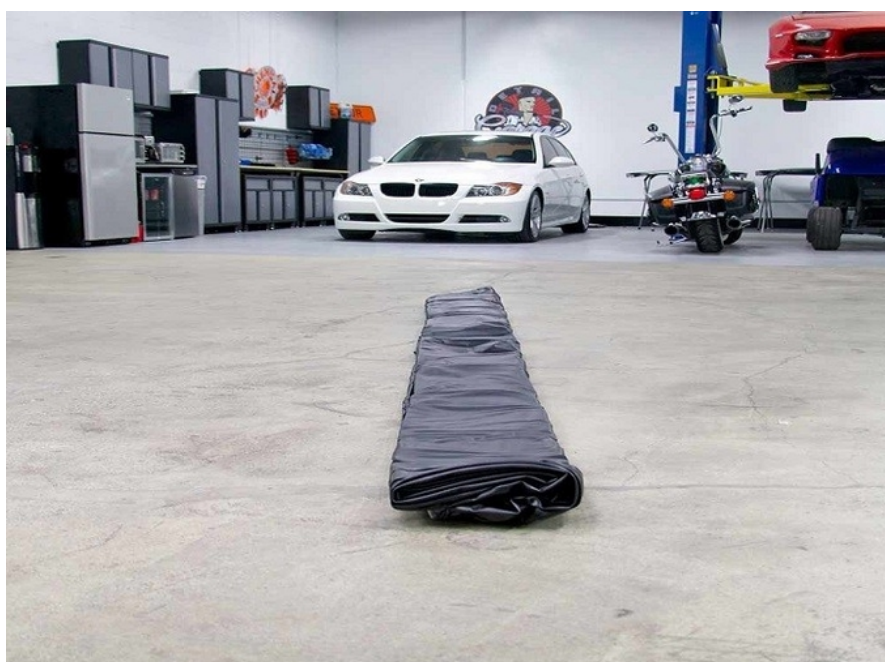

Product Description

The Car Wash Water Containment Mat and Water Reclamation System helps save the environment while limiting the impact of water waste while washing or detailing. The water containment mat keeps you and your business environmentally compliant while detailing or washing virtually anywhere. The walls of the wash mat are 4 inches tall to allow for maximum water containment. Traditional mats require foam ends that easily deteriorate and are difficult to fold and store. Once foam edges are folded, they crease and take time to unfold, if they unfold at all. With the Chemical Guys mat, simply unfold and inflate for fast easy water containment. Vehicles can easily be driven over the inflatable beam, making it easy to load new vehicles onto the mat. This mat has a specially designed dual opening valve. The first valve is one way so that even if you inflate your mat and forget to put the cap on, your mat will not leak. The wide-mouth opening is for fast deflation, simply open it and allow to deflate or reverse your electric included hand pump and your mat deflates in seconds.

More Photos About Mats for Reference:

A summary of the advantages of the floor: The wash pad is mobile, flexible and fast to set up. The standard inflatable wash pad weighs only 1Kg per square metre and can be easily transported. They are durable, chemical-resistant and can be manufactured on a bespoke basis in various materials. Many applications are possible especially as the wash pad can be custom made.

Why Buy This Product?

Free-standing inflatable water containment mat
Easy and fast setup and tear own
Inflate and deflate from one valve
Perfect for containing water runoff for responsible disposal
10'x20' dimensions fit most cars, trucks, motorcycles and SUVs
4" high bumpers capture water, dirt and grime washed from vehicles
New extra strong material - made from .48 mm PVC(customized)

As the mat are manufactured to order,bespoke sizes of both containment wall(down to 100mm diameter)and the overall width and depth are available.
