#### More pictures for reference:

**Technique:**

**1.Reliable And Durable Materials**

High quality materials are essential for producing inflatable products. All of the raw materials we used are originated from the best material supplier in China——PLATO. All of the raw materials we used have passed EN71, EN14960 and ROSE test.

**2.Durable Zipper And Safe Air Value Sheet**

Each inflatable product is designed with a strong zipper in the bottom for quick deflation and an air flap for force dispersion. For sake of security, inside airbag is designed with safe air value sheet for sudden accidents. For example, if the blower stops working, the air value sheet will slow down air leak and let people have enough time to get out of the product.

**3.Unique Soft EVA Ladder**

Giant inflatable slides are designed with fixed assistant ropes and unique soft EVA ladders to make it safe, easy and convenient to the top of the slides.

**4.Professional Fixation Design**

Each inflatable product is designed with a set of D shape or round metal ring anchors to make installation easy and firm in condition of strong wind and different places.

**5.Professional Packing Service**

For years, we dedicate to providing professional packing service for our customers. For each product, we use soft carpets for inner packing, waterproof PVC bags for secondary protection and transparent PE films for outer packing, in order to make sure that products won't get damaged during transportation. Each package is attached with the exact picture of products and order number for easy classification. For extra large products, we use steel pallet, for which the fees are quite reasonable and negotiable.

**For any questions, just contact us and we'll be happy to speak to you.**
