Product Description

Large Beetle Inflatable Tent , White Inflatable Structure Building With Brand Printing For Event

Roof tent's description: Customized, any request

Roof tent inflatable structures have been light weight and open to abuse from weather and more importantly the wind. The new air roof range offers greatly improved performance through extensive design and engineering. Air roof inflatable event structures can withstand wind speeds and gusts of up to 55 mph therefore ensuring your event is not affected at any time of the year. Creative design will attract more people.

Colours and materials

All our structures are manufactured in ripstop nylon and reinforced PVC. As standard they are made in white and grey. Although a full colour range is available, this may alter lead times and costs.

Branding:

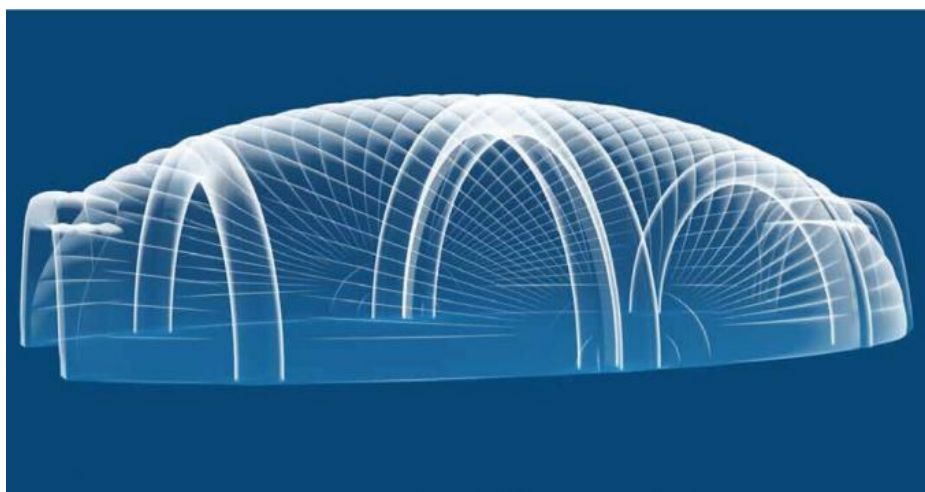

Branding can be applied permanently to any of our inflatable structures by screen printing or digital printing at the source of production. Temporary branding can be added as vinyl or Dacron adhesive panels at any stage. Please note that not all artwork is suitable for printing on our structure range. It is advised that sample artwork be supplied to us in .eps format so that we can advise the best solution. Full replaceable covers are available for our range of inflatable buildings. These can be branded and printed to ensure your inflatable structure matches your brand.

Transport

Shipping way: By sea, by express, by air, etc.

By its nature an inflatable structure packs down to considerably less than its inflated size. The largest of our range packs down to less than 2M³ which makes the structures ideal to store and use again. Each product will be supplied in its own storage bag and will be easily transported in an out of any venue.
