. Professional service team 24 years online solve problems in time, send us the inquiry, we will reply you soon.

. 2-3 years quality guarantee commercial grade excellent quality.

Quality Assured:

Safety Material:

0.55mm-0.9mm PVC Tarpaulin

High quality materials are essential for producing inflatable products. All of the raw materials we used are originated from the best material supplier in China—PLATO. All of the raw materials we used have passed EN71, EN14960 and ROSE test.

High quality commercial grade pvc vinyl (1400*1400 denier vinyl) as materials stronger baffles offer maximum strengths, secure excellent legendary durability multiple rows stitching reinforced seams to bear higher against ripping HD image color, silk printing at 1400DPI, UV & rain resistant, not easy to fade.

Stronger Baffles:

Baffles provide the internal structure of an inflatable. Have you ever seen a bounce house with a mattress that has ballooned out? Blown baffles are likely to blame. That is why we only use baffles that are secured by Commercial Grade Vinyl at 1400*1400 denier that provides maximum strength and durability. This material is also perfect for inflatables used in an indoor environment (as they often receive much more use and abuse) and is key to the legendary durability of our products.

Reinforced Seams:

We always use at least two rows of stitching on all of seams. But some seams just need a little extra, especially on high-stress areas like a bounce house's mattress. Think of those kids jumping up and down, up and down, up and you get the picture. That's why we insist on reinforcing each and every one of those critical mattress seams by using a seam reinforcement strip that bridges the seam, thus eliminating the stress.

HD printing:

Industry leading digital art work, printed by the best digital printers on the market. We use a fantastic lacquer process to protect the artwork which is perfect for protecting against the varying weather. We bring in professional HD printer for product printing and the printing result can reach 1400 DPI. The durable vinyl coated nylon is resistant to UV, aging and scratching, which ensures a long-lasting company and brand profile.

Safety For Kids

We only use Finger-Safe netting on our bounce houses and combos. While still transparent enough to allow for easy viewing, the holes of this special netting are too small for even the smallest child's fingers to penetrate. The majority of bounce houses on the market, on the other hand, use cheaper standard netting. This means a child can easily fit their fingers through, potentially causing both damage to the netting and harm to the child's fragile fingers. We never cut corners with our products, and always strive to provide the safest environment possible, even if it costs a little more.

Free Custom Design/Custom OEM/ODM

More than 20 years' manufacturing experience of inflatable products. Offer OEM/ODM service for many leading brands around the world.

Our designers will work with you to create the customized inflatables that is right for you.
