FAQ of Inflatable Water Park:

1.How big is the Water Park?

Approximately 25m x 25m

2.How old do palyer have to be?

There is no age range you just have to be a strong swimmer.

3.How many people are allowed on it at one time?

100

4.What is the difference between modular and standalone Barry products?

Inflatable water park products are differentiated into two categories: modular or standalone. Place a standalone product (e.g. the IceTower, Bouncer etc.) to your location or Sports Park to add more variety, challenge and attraction to it. Some products (i.e. Roller) can be attached to the Bouncer. The modular products can be connected to each other in any order shape and form.

5.What parameters do I need to consider when choosing the right combination for my pool?

Water depth, budget, pool dimensions and how many people you want to entertain. We are happy to help you with this!

6.How is the minimum water depth calculated?

The formula is: height of product + average height of a person (1.80m or 5.90') divided by 2. You can find all minimum water depths in the product section.

7.Does water park need a constant air pump for inflation?

The products do not use constant air inflation instead the products only need to be inflated once as they are sealed.

8.How are the modular products connected to one another?

With 2 Connector Straps and 1 Safety Flap. The two Connector Straps are attached to anchor plates located underneath the products then the Safety Flap is placed over the two products and fixated through . Straps and Flap are included with the Barry products that can be connected.

9.We have a unique idea for an inflatable product can you help me?

Yes , bring it to us . Need a non-disclosure from completed we provide . Let us know what you need. We can and do it .
